Everyone Deserves a Nutritious Meal®

News Release

York Ag Sponsors 2022 Annual Celebration Event Organized by The Ohio Poultry Association

The egg and poultry industry trusts York Ag's ingredient solutions to maximize performance and support animal well-being.

(York, Pa., September 1, 2022) York Ag, a dynamic supplier of holistic ingredient solutions that optimize animal well-being, has become a gold sponsor of the Ohio Poultry Association's Golf Outing and Celebration Banquet scheduled on September 8-9, 2022. The Ohio Poultry Association (OPA) represents more than 1,000 egg, chicken, and turkey farmers across the state. Each year, Ohio's egg, chicken, and turkey farms contribute 3.2 billion eggs, 2.4 billion chickens, and 1.5 billion turkeys.

Since 1988, York Ag has been a key partner of the egg laying industry. Its proprietary YORK CALCIUM CHIPS® provide optimal levels of calcium into the layer diets to guarantee smooth egg production and improve layers' calcium reserves. Calcium is a cornerstone in layer diets because it is intrinsically related to the formation of an eggshell. Having optimal feed calcium levels helps hens replenish their bone reserve while maintaining optimal egg production capabilities. "We are delighted to support the Ohio Poultry Association and join in celebrating the poultry industry of the state," said Bill Achor, President and CEO of York Ag.

York Ag believes Everyone Deserves a Nutritious Meal® and has expanded its ingredients portfolio to represent national and international brands that focus on complementing animal nutrition requirements in layers, pullets, broilers, and ABF/NAE broilers, and turkeys.

"We represent Probiotech International in the U.S. This portfolio includes excellent products that focus on supporting gut health and overall animal well-being. From Alterna Poultry, Phytozen, and Synbiotec to ParaShield, Tenemax, and Biotanix, we offer a wide array of solutions for poultry producers," said Achor. "We also commercialize PECKStones, a unique enrichment tool designed specifically to prevent and reduce abnormal pecking behavior in poultry."
