# Everyone Deserves a Nutritious Meal®

## News Release

### York Ag Exhibits at 2022 R-CALF USA National Convention

**York Ag will share its ingredients portfolio with beef cattle producers at a national convention organized by R-CALF USA, an organization that represents thousands of U.S. cattle producers in 43 states.**

(York, Pa., August 7, 2022) York Ag, a dynamic supplier of holistic ingredient solutions that optimize animal well-being, will exhibit at the 2022 R-CALF USA National Convention in Deadwood, SD (August 18-19, 2022, at *The Lodge at Deadwood - 100 Pine Crest Ln, Deadwood, SD 57732*). R-CALF USA is a national, non-profit organization, dedicated to ensuring the continued profitability and viability of the U.S. cattle industry. It represents the collective voice of U.S. cattle and sheep producers, in domestic and international trade and marketing issues.

Since 1988, York Ag offers ingredient solutions for feed manufacturers, livestock consultants, and animal producers. Its beef ingredients portfolio includes alternatives to address the main challenges experienced in a beef cattle operation. "Our ingredients are suitable for all types of beef cattle feeding programs and we are delighted to sponsor and exhibit at the R-CALF USA Convention this year," said Bill Achor, President and CEO of York Ag.

York Ag believes Everyone Deserves a Nutritious Meal®. Its proprietary products, BOVAZYME® and BOVAZYME® Organic are feed enzyme additives that aid in digestion and help mitigate bloating events in beef cattle. BOVAZYME contains 7 food-grade enzymes that help break down less accessible nutrients to make them more readily available for further microbial action.

In addition to BOVAZYME, York Ag, also distributes yeast-based additives such as RYeast40®, a natural product offering excellent nutrition for the rumen flora. Yeasts play a variety of roles in the cattle digestive tract working in both the rumen and in the intestinal tract. In the rumen, the contents of the yeast cell help stimulate growth and activity of the microbial population to enhance feed and forage digestion.

Furthermore, York Ag is an authorized distributor of KENDER Bio Tech, a U.S.- based company with more than 30 years of experience in ruminant feed additives. From KENDER® Beef 101/102 to KENDER® Organic 301/302, and KENDER® Fly Shield, York Ag offers a precise set of solutions for beef cattle applications.
