## News Release

# York Ag Shares Its Ingredients Portfolio at Agri-Basics Dairy Seminar

**York Ag sponsors dairy meetings organized by Agri-Basics, an independent dairy consulting nutritionist firm.**

(York, Pa., November 7, 2021) York Ag, a dynamic supplier of holistic ingredient solutions that optimize animal well-being, will promote its ingredients portfolio for dairy applications at the Agri-Basics Dairy Seminar in New Holland, PA (December 9, 2021). Agri-Basics is an independent dairy consulting nutritionist firm based in Elizabethtown, PA. This event will bring dairy specialists to share dairy management tips with dairy farmers from different counties.

The Agri-Basics Dairy Seminar will include speakers Kevin Dhuyvetter, PhD, Technical Consultant for Elanco Animal Health, who will cover the topic "Dairy Replacement Heifer Economics", and Kirk Sattazahn, VP of Marketing and Development with Premier Select Sires, Inc., who will discuss "Maximizing Revenue with Beef on Dairy."

York Ag is a consistent sponsor of Agri-Basics' educational events. "Agri-Basics offers a great opportunity for farmers and agri-business professionals to come together and learn from industry experts. We believe Everyone Deserves a Nutritious Meal, so these events offer an opportunity to share best animal nutrition practices with our local communities", said Bill Achor, President and CEO of York Ag.

York Ag's proprietary products, BOVAZYME® and BOVAZYME® Organic are feed enzyme additives that aid in digestion and mitigate bloating events in dairy cows. "If I could summarize the benefits of BOVAZYME, I would say that it targets fiber and cellulose breakdown, it makes protein and fat digestion more efficient, and it helps generate more profitable output with the same input," said Achor.

York Ag is the exclusive U.S. distributor of Hilyses®, a natural sugarcane derived yeast additive that supports animal well-being with abundant vitamins, minerals, nucleotides, beta-glucans, and mannan oligosaccharides (MOS). In addition to Hilyses, York Ag, also distributes other yeast-based additives such as IMW50® and RYeast40®, this last one offering excellent nutrition for the rumen flora.

Furthermore, York Ag is an authorized distributor of KENDER Bio Tech, a U.S.- based company with more than 30 years of experience in ruminant and monogastric feed additives. From KENDER® Dairy 201 and 202, to KENDER® Organic 301 and 302, and KENDER® Fly Shield, York Ag offers a precise set of solutions for dairy applications.
