

INNOVATIVE DEPENDABLE EFFECTIVE

PECKStone™ is changing the pecking order.

York Ag is an authorized U.S. distributor of **PECKStone™**, a unique enrichment tool designed specifically to prevent and reduce abnormal pecking behavior and improve animal welfare — superior to other poultry pecking blocks.

Pecking (or picking) is a common problem among domesticated chickens, turkeys, and other poultry. Birds will peck to forage for food, and they will peck one another to establish order, hierarchy or to relieve stress or boredom.

Although it is natural for chicken pecking to occur, it can lead to some very unnatural outcomes. Injury, mortality, and cannibalism are all possibilities as bully birds work to the top of the pecking order.

PECKStone™ poultry blocks can help decrease this harmful behavior, thus increasing poultry productivity. Newer housing systems in poultry farming may increase feather pecking, incidences of skeletal injuries, and mortality.

PECKStone™ is a unique enrichment tool designed specifically to prevent and reduce abnormal pecking behavior.

- Provides an effective chicken pecking block target — redirects aggressive pecking behavior to prevent poultry cannibalism
- Supports beak conditioning as it can be used in conjunction with beak trimming or as a tool to aid natural beak conditioning if trimming is not employed
- Durable yet destructible, all natural and organic, enhances animal welfare, and easy for any operation
- Vital salts and minerals incorporated, but no impact to overall nutrition/diet
- Available for all poultry: commercial flock - layers, pullets, broilers, breeders, and turkeys.

PECKStone™ Change the pecking order

"I've noticed that the birds with PECKStones have fuller feathers and seem less aggressive. It provides a distraction from pecking each other. Egg production is high. Not to mention they are so easy to use."

Egg Farmer, Pennsylvania

PRODUCT SPECIFICATIONS

TYPES: Available in EXTRA HARD and DUO

RATE: Place 1 PECKStone™ for every 500 birds

DISPOSAL: PECKStones can be left to naturally degrade and be destroyed by pecking. Residual stone remnants and empty bucket can be discarded with other waste from operation. The tub may be recycled.

INGREDIENTS: calcium carbonate, monocalcium phosphate, salt, magnesium oxide, sodium sulfate, magnesium sulfate, wheat bran.

PECKStone has been found to be in compliance with the National Organic Program (NOP) Standards.
