

INNOVATIVE DEPENDABLE EFFECTIVE

PECKStone™
Change the pecking order

Promote natural pecking
behavior and improve
animal welfare.

INNOVATIVE DEPENDABLE EFFECTIVE

PECKStone™

Change the pecking order

PECKStone™ is changing the pecking order.

York Ag is an authorized distributor of **PECKStone™**, a unique enrichment tool designed specifically to prevent and reduce abnormal pecking behavior and improve animal welfare — superior to other poultry pecking blocks.

Pecking (or picking) is a common problem among domesticated chickens, turkeys, and other poultry. Birds will peck to forage for food, and they will peck one another to establish order or hierarchy or to relieve stress or boredom.

Although it is natural for chicken pecking to occur, it can lead to some very unnatural outcomes. Injury, mortality, and cannibalism are all possibilities as bully birds work to the top of the pecking order.

PECKING BEHAVIOR

Aggressive, abnormal pecking behavior is a common and serious welfare and economic threat to poultry farming.

PECKStone™ poultry blocks can help decrease this harmful behavior, thus increasing poultry productivity. Newer housing systems in poultry farming may increase feather pecking, incidences of skeletal injuries, and mortality^{1,2} – one of the key current issues in the poultry industry.

- 55-80% of producers report signs of feather pecking
- Preventing poultry behavioral disorders is ideal
- Once abnormal pecking starts, it is difficult to stop
- It is critical to diagnose and intervene immediately to prevent feather pecking and cannibalism in chickens

Environmental enrichment with poultry supplies and equipment can help:

- Satisfy birds' extremely strong desire to forage, scratch, and peck.
- Minimize undesirable, harmful behavior, including aggression, feather pecking, cannibalism, flightiness, and distress.
- Enhance animal well-being

PECKStone BENEFITS

PECKSTONE IS A UNIQUE ENRICHMENT TOOL DESIGNED SPECIFICALLY TO PREVENT AND REDUCE ABNORMAL PECKING BEHAVIOR.

- Provides an effective chicken pecking block target — redirects aggressive pecking behavior to prevent poultry cannibalism
- Supports beak conditioning as it can be used in conjunction with beak trimming or as a tool to aid natural beak conditioning if trimming is not employed
- All natural, enhances animal well-being, and easy to incorporate into any operation
- Durable yet destructible — the ideal pecking target
- Vital salts and minerals incorporated, but no impact to overall nutrition/diet
- Available for any poultry operation: layers, pullets, broilers, breeders, and turkeys

PECKStone™
Change the pecking order

PRODUCT SPECIFICATIONS

TYPES: STANDARD (*one piece*) and DUO (*possibility to split in half*)

RATE: Place 1 **PECKStone™** for every 500 - 800 birds

DISPOSAL: PECKStones can be left to naturally degrade and be destroyed by pecking. Residual stone remnants and empty bucket can be discarded with other waste from operation. The tub may be recycled.

INGREDIENTS: calcium carbonate, monocalcium phosphate, magnesium oxide, sodium chloride, magnesium sulfate, sugar cane molasses, sodium sulfate.

PECKStone™

Change the pecking order

The material composition (95 per cent minerals) allows for added intake of calcium, magnesium, sodium, and trace elements – supporting bone structure, better plumage, and general health.

HOW TO USE PECKStone

**LAYERS
AND BREEDERS**

**BROILERS
AND PULLETS**

TURKEYS

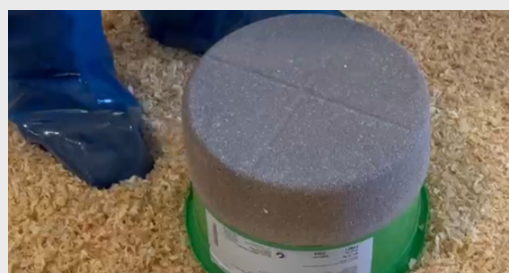

STEP 1
Unpack and select a location

STEP 2
Remove stone from tub

STEP 3
Place stone on top of tub

STEP 4
Step back and watch

PECKStone™

Change the pecking order

"I've noticed that the birds with PECKStones have fuller feathers and seem less aggressive. It provides a distraction from pecking each other. Egg production is high. Not to mention they are so easy to use."

Egg Farmer, Pennsylvania

YORK AG AND VILOFOSS

York Ag is an authorized U.S. distributor of **PECKStone™**, a unique enrichment tool designed specifically to prevent and reduce abnormal pecking behavior and improve animal welfare.

York Ag's supplier Vilofoss® is a European-based, global leader in the premix and animal nutrition sector, with more than 90 years of experience and presence in 60 markets worldwide. With 17 manufacturing plants in Europe and 375,000 tons of premixes produced, Vilofoss is one of the world's most productive, competitive, resource-efficient and sustainable agricultural production companies.

VILOFOSS®

WHO WE ARE

York Ag is a dynamic supplier of holistic ingredient solutions focused on supporting animal well-being.

WHY WE EXIST

York Ag lives to bring innovative, dependable, and effective feed ingredient solutions to feed manufacturers, livestock consultants, and animal producers.

HOW WE OPERATE

York Ag uses determination, curiosity, and a collaborative approach to recommend and supply functional products that deliver both performance and profitability in an increasingly transparent marketplace.

OUR HOPE

York Ag seeks to enrich the lives of animals, producers, and consumers.

Everyone Deserves
a Nutritious Meal®
