PRODUCT	DESCRIPTION
YORK CALCIUM CHIPS®	A proprietary coarse feed calcium that helps build a superior eggshell, improves feed digestion, and strengthens bone structure. Approved for use in organic operations.
ARAGONITE-C	A highly soluble and bioavailable calcium supplement for poultry applications. Approved for use in organic operations.
	York Ag is an authorized U.S. distributor of Hilyses, a unique combination of mannan-oligosaccharides (MOS) and hydrolyzed yeast that delivers functional components to support poultry through stress and disease challenge.
	York Ag is an authorized U.S. distributor of IMW50, the most concentrated combination of β -glucans and mannan-oligosaccharides (MOS) in the commercial space. This blend also includes trace minerals and vitamins, all working together to promote animal well-being by stimulating the immune system and enhancing gut health.
	A unique enrichment tool designed specifically to prevent and reduce abnormal pecking behavior and improve animal well-being.
	A highly compressed durable block with whole grains and molasses that promotes birds' natural foraging behavior and well-being. Available for use in organic operations.
	York Ag is an authorized U.S. distributor of Stalosan® F, an EPA-registered dry germicide. Its multi-action disinfecting power provides long-acting protection. This effectively helps reduce costly health issues, such as bacteria, viruses, fungi and insects. Stalosan® F kills pathogens, neutralizes ammonia, lowers pH, and keeps the barn drier.
POULTRY SHIELD FG	A granular, feed-grade sulfur to aid in the control of ammonia generated in poultry houses by reducing the pH of the litter. Approved for use in organic operations.
YELLOW JACKET WETTABLE SULFUR	A sulfur powder formulated for use in dusting boxes to control Northern Fowl Mites or mixed as a solution and sprayed in poultry houses for control of certain fungi, parasites, and other diseases. Approved for use in organic operations.
STAY-BLUE-G	A food-grade, granular blue dye functioning as a visual indicator to confirm delivery of sanitizers, water vaccines, and other liquid additives. Approved for use in organic operations.

PROBIOTECH POULTRY SOLUTIONS

GUT HEALTH

DESCRIPTION

ALTERN^A POULTRY

Formulation of botanicals, medium chain fatty acids, and organic acids that support gastrointestinal health and growth rate. Alterna Poultry OP available for use in organic production.

ALTERN^A HTS

Botanical-based feed additive designed to regulate the gut Histomonas population. Alterna HTS OP available for use in organic production.

AQUAGUT^{POULTRY}

Botanical-based liquid product that addresses a broad range of gut-health issues including bacteria and parasites. AquaGut OP available for use in organic production.

SYNBIOTEC^{POULTRY}

Blend of botanicals, saponins, and polyphenols formulated to promote intestinal and microbial health during a coccidiosis challenge in operations without a coccidiostat program. Synbiotec Poultry OP available for use in organic production.

SYNBIOTEC^{CVA}

Blend of botanicals, saponins, and polyphenols formulated to promote intestinal and microbial health during a coccidiosis challenge for use in conjunction with a coccidiostat program.

STRESS MITIGATION

PHYTOZEN[®] 250

Botanical-based feed additive that mitigates stress in birds by reducing cortisol levels which decreases the fight or flight response. Also available in liquid form. Phytozen OP available for use in organic production.

RESPIRATORY HEALTH

FEEDFRESH^{OP}

Botanical-based feed additive that supports the health of respiratory organs in poultry. Approved for use in organic operations.

AQUAFRESH

Botanical-based liquid product that supports the health and function of respiratory organs, acting as a decongestant, vasodilator, anti-inflammatory, and antiviral.

PRODUCTION ENVIRONMENT

AVIA^{SHIELD} PECK

Strong, aromatic botanical repellant with a toxic effect on ectoparasites. AviaSpeck OP available for use in organic production.

PARA^{SHIELD} LIQUID OP

Botanical-based liquid product that disrupts the life cycle of harmful intestinal parasitic worms. Approved for use in organic production.

TENEMAX[®]

Drying agent used to help lower the darkling beetle population in poultry litter. Tenemax OP available for use in organic production.

BIOTANIX[®] WS

Litter amendment that utilizes competitive exclusion to improve the microbiome of poultry litter.

York Ag is an authorized U.S. distributor of Probiotech International Inc.
